Section 3: Hazard Identification

EMERGENCY OVERVIEW: L50KU-1-2 as sold in solid form is generally not considered hazardous. However, if the process involves elevating the temperature above 450F (232C), hazardous levels of airborne gasses could be generated.

PRIMARY ROUTES OF ENTRY:

Inhalation: At processing temperatures above 450F (232C), fumes irritating to the eyes, nose and throat may be produced. This exposure may cause irritation to eyes, respiratory system, and skin. If exposed to fumes from overheating or combustion, move to fresh air. Consult a physician.

Skin Contact: No data available. However, based on experience, no unusual dermatitis hazard is expected with routine handling. Molten material contacting the skin will cause thermal burn.

Eye Contact: Mechanical irritation only.

Ingestion: Not a probable route of exposure.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Persons with asthma may experience respiratory irritation upon exposure to fumes.

CARCINOGENIC REFERENCES: This product contains chemicals known to the State of California to cause cancer (SBO₃).

Section 4: First Aid Measures

FIRST AID FOR EYES: Flush for at least 15 minutes. If irritation persists or develops, consult a physician.

FIRST AID FOR SKIN: The membrane is not likely to be hazardous by skin contact but cleansing the skin after use is advisable. If molten material gets on skin, cool rapidly with cold water. Do not attempt to remove material from skin. Obtain medical treatment for thermal burn.

FIRST AID FOR INGESTION: No specific intervention is indicated as compound is not likely to be hazardous by ingestion. Consult a physician if necessary.

FIRST AID FOR INHALATION: If exposed to fumes from overheating or combustion, move to fresh air. Consult a physician if necessary.
